

Inpatient Nurse - Nights

We are seeking RN's to attend to our spine surgery patients. We will be running 12-hour shifts and opportunities exist for the night shift. We will have great nurse-to-patient ratios and opportunities for you to be an active participant in your patients care.

Job Functions:

- Ensure the provision of customer focused care
- Provide accurate and ongoing physical, psychological, social, safety, educational and discharge needs of each patient
- Assist with management of wounds
- Manage patient charts and comply with HIPAA regulation

We are seeking candidates with an active RN license and at least 3 years experience on a surgery floor. Spine or ortho experience highly desirable.

RN, Infection Control

Job Functions:

- Responsible for development and coordination of the hospital-wide Infection Control Program which includes surveillance, analysis, and reporting of nosocomial infections
- Educate employees about infection control; and the development of health system policies and procedures to insure rigorous infection control standards governing standards.
- Acts as a resource to Administration, Medical Staff, and all hospital services.
- Drafts, reviews, and evaluates Infection Control policies or practices associated with infection

Requirements

We are seeking candidates with an active Indiana RN license and two years infection control experience. CIC preferred.
